Nathan Dong is a Software Developer and a new grad from British Columbia Institute of Technology.

Development Skills

Programming Languages	Technologies	Tools
<ul style="list-style-type: none">PythonJavaScript, HTML5JavaC	<ul style="list-style-type: none">CSS, BootstrapNodeJSReactSQL, RDBMS	<ul style="list-style-type: none">VS CodeVCS, Git, GitHub

Experience

PokeRetiever – School Project

- Implemented using Object-Oriented programming with asynchronous HTTP requests to PokeAPI using Python. API data transformed into Python objects with information presented via console or output txt file.

Vancouver Rental Data Analysis – Personal Project

- Generated Vancouver Rental price dataset using Craigslist web scrapping, pre-processed/cleaned the dataset and analyzed the dataset using Python, NumPy, pandas, Seaborn and matplotlib.

Education

British Columbia Institute of Technology

Computer Systems Technology

Graduation December 2021

Diploma

Burnaby, BC

- Graduation with GPA of 86%
- Artificial Intelligence and Machine Learning Option
 - Introduction to key concepts and techniques used in Artificial Intelligence and machine learning
- Object-Oriented design principles and patterns
- HTML5, CSS, Bootstrap, NodeJS, Express and Angular. Relational Database Management Systems, SQL queries, CRUD operations and developing RESTful API's.

Interests

Watching coding simulations YouTube videos, video games, reading, music and watching TV series/movies
